THE WORLD OVER

TURKEY WILL DEPORT INSULL

RESCUE PLANES ARE WRECKED

BRITAIN HAS HUGE A SURPLUS

ISTANBUL — The Turkish government brought Samuel Insull, auditor from his floating refuge and have decided to hand him over to the United States.

Meeting at Ankara, the cabinet voted to surrender the 74-year-old fugitive after an Istanbul court had decided his offences were of a political or a military nature. Still fighting to the last, the grey-haired former Chicago utilities magnate protested vehemently against the action.

MOSCOW — With two planes already wrecked attempting to reach nearly 100 men stranded on an ice-floe off the northern coasts of Siberia, Soviet rescuers were confident they would succeed with the possibility three other fliers may be down, possibly dead.

Word has been received that the aviators Komant, Molokoff and Pervinchen have been unreported since taking off in three ships from Anadyr on March 29 for Cape Vankarem, site of the rescue base.

LONDON — The close of the financial year gives Great Britain a monster Easter egg in the form of a realisation surplus of \$1,180,000 pounds sterling, or \$15,855,000. The chancellor of the exchequer, Neville Chamberlain, who is seldom failing at double, forgot his role long enough to receive a telephone saying his revenue in the past year amounted to 724,547,000 pounds sterling as against expenditure of 632,419,000 pounds.

This last figure includes a seven million pound sinking fund and over three million pounds in debt payment to the United States, neither items being provided for in the budget estimates.

"No, I suppose you can't."

"You have fallen into the same error that has misled many other students. That is the velocity of circulation fallacy. You seem to think that if a dollar circulates fast enough it will cause more goods to be consumed. You forget that one dollar will pay only one dollar's worth of costs."

"But I can take a dollar and buy a tie from the Men's Store and the manager can take that dollar and buy some meat from the butchers and the butcher can give the dollar to his agent advanced, the volume of goods consumed would depend on how many times the cycle could be repeated in a year. If the goods could be produced, sold, and the loan returned every three months you would move \$40,000 of goods in twelve months. If it could be done in two months for each cycle the amount distributed would be \$60,000 worth. But no matter how fast a dollar circulates around in the business world it does not get any more goods consumed than one dollar's worth and it does not pay off debts until it returns to the banking system. In your illustration a few minutes ago you would really happen in this. You would buy a tie from the Men's Store for one dollar. They would keep eighty cents to pay the wholesaler and other selling expenses in connection with the tie, and would use the twenty cents profit to buy meat at the butchers. Out of the 20c the butcher received he would be able to consider five cents as profit and this he would give to his wife. Instead of a pair of silk stockings she would be able to get a pair of cotton at the Ladies Shop."

"J. 'And out of that the Ladies Shop would probably have enough profit to buy a one cent stamp from the government! Ha! Ha!"

"Well, now you seem as if you have grasped the situation."

"J. 'That explanation has helped a lot. But I've heard eminent men talk the same way so that you can't blame a poor layman for not knowing any better.'"

"W. 'Some of those 'eminent men' have a lot to answer for. But more and more they are being debunked and found out.'"

"J. 'Well, let's get on with Social Credit. What's Douglas going to do about this?'"

Easter School Report For Rooms 1 and 2

Sergeant—Did you hear about that? How Recruit—No. What about that?

Andy phoned the water officer, relative to the hours for watering the lawn. "What is the proper time to put on my hose?" she asked.

"Really madam, I believe immediately after your B.V.D.'s," came the ready answer.

Niece: They say there are more marriages of blondes than brunettes. Why is that?

Bachelor Uncle: Ha, Naturally, the light-headed ones are first."

Chisham—How are you getting on with your new house? Suburbanite—Fine. I've not the roof on the mortgage on, and I expect to have the floors and the walls in before summer."

What about the money to pay the mortgage on? Is it the Men's Store going to get the money to pay the manufacturer? "J. 'But they may have been paid for already.'"

"W. 'Suppose they were paid for. Is the Men's Store going out of business, and does your butcher not have to buy more meat? If you are a merchant and take money from the till to buy produce, you can't use that same money to pay business debts, for the simple reason that you haven't got it.'"

"J. 'It seems as if I have been astray on a lot of things.'"

"W. 'Well, you can see how about the velocity of circulation fallacy is if it follows it to the logical conclusion. That is, that if one dollar only circulated fast enough all the business of the country could be transacted by it. However, even at the risk of causing you to forget our discussion on the law I must draw your attention to a velocity of circulation theory that is correct.'"

"J. 'And what is that?'"

"W. 'The complete circuit of money from bank to industry to consumer to shopkeeper to industry to bank. Suppose that it takes \$1000 to finance a certain program of production. If the goods could be sold immediately, the bank loan repaid, and the loans again advanced, the volume of goods consumed would depend on how many times the cycle could be repeated in a year. If the goods could be produced, sold, and the loan returned every three months you would move \$40,000 of goods in twelve months. If it could be done in two months for each cycle the amount distributed would be \$60,000 worth. But no matter how fast a dollar circulates around in the business world it does not get any more goods consumed than one dollar's worth and it does not pay off debts until it returns to the banking system. In your illustration a few minutes ago you would really happen in this. You would buy a tie from the Men's Store for one dollar. They would keep eighty cents to pay the wholesaler and other selling expenses in connection with the tie, and would use the twenty cents profit to buy meat at the butchers. Out of the 20c the butcher received he would be able to consider five cents as profit and this he would give to his wife. Instead of a pair of silk stockings she would be able to get a pair of cotton at the Ladies Shop."

"J. 'And out of that the Ladies Shop would probably have enough profit to buy a one cent stamp from the government! Ha! Ha!"

"Well, now you seem as if you have grasped the situation."

"J. 'That explanation has helped a lot. But I've heard eminent men talk the same way so that you can't blame a poor layman for not knowing any better.'"

"W. 'Some of those 'eminent men' have a lot to answer for. But more and more they are being debunked and found out.'"

"J. 'Well, let's get on with Social Credit. What's Douglas going to do about this?'"

FARMERS' ANNUAL LOSS FROM WEEDS IS NEARLY \$179,200,000

Professors of Agricultural College of the University of Manitoba specializing in weed control and eradication have made considerable headway that loss to Western Canadian farmers through weeds amounts to \$179,200,000 annually.

In order to provide farmers with information as to the best means of combating the weed menace, Dr. G. P. McKelvie, Professor of Agronomy, and W. Hildesley, assistant on weed research, approached the Northwest Grain Dealers' Association with a proposal that the line elevator companies finance scientific investigation concerning weed eradication. Becoming the need for such a study of the weed problem, the elevator men undertook to raise the funds necessary for the study. This work has now been proceeding for the past three years and the results of investigations of Professors have turned over to the Northwest Grain Dealers.

The studies relate to Couch Grass, Sow Thistle, Canada Thistle, control of weeds by chemicals and destruction of weed seeds by ensiling. The first of the pamphlets dealing with these subjects is now in the hands of all line country elevator agents for free distribution to farmers. Any farmer may now obtain the latest scientific information on this important subject at any local line elevator.

The quality of Canada's grain crops and available volume of production can only be obtained through control of weeds. Line elevator company owners are deserving of appreciation of the farming population in recognition of the need for scientific study of the problem and the making available of the results of these experiments to the farmers of the West.

Larkham Collins, chartered accountant and of Calgary, spoke on the Douglas Plan to a large audience in the Farmers' Exchange hall yesterday afternoon. We will try to have a report in our next issue.

An old gentleman handed over five shillings to a small boy on his fifth birthday, saying: "There—that's a shilling, for every year you've lived. What more could a little boy wish for?" The boy said: "Only that I was as old as you."

"Now, what about some elastic?" suggested the commercial traveller who was getting an order from an Aberdeen shoemaker.

"No, no," said the Aberdeen. "For the sake of my wife I couldn't mention a yard of your last commitment without the darned stuff snapping."

"Fresh from the Gardens"

An Exhibition Of Childhood

London is to witness a most unique exhibition when, on April 19, will open a display of relics of "Children throughout the Ages", the most comprehensive portrayal of child life down the centuries ever presented to the public. The event derives significance as much from the historic value of the various exhibits, as from the purpose to which the proceeds are to be devoted. The beneficiary will be one of London's most deserving charities.

The relics to be displayed link child life with the dim remote ages of the past, the oldest exhibit being a Chinese doll said to date from 600 B.C. From that far distance down the years, the varying fashions of children, the toys which brought them pleasure, the garments they wore, the furniture which decked their nurseries and playrooms, all will be traceable in the array of exhibits from the pre-Christian era down to the end of the reign of Queen Victoria.

Queen Elizabeth's christening robe, her cap and mittens, a portrait of her as a baby (by Holbein), will be on show. A shirt worn by Charles I. as a child of two, his boyhood's broadsword coat, will find prominent place in the display beside Oliver Cromwell's christening robe. Here then that historic empty which ended so tragically for the monarch is made to symbolize the transitory nature of human passions and, transformed, serves the charitable purposes of to-day. Napoleon, too, will be represented, not in a manifestation of military might but rather in the guise of the child who loved which great and lofty have in common, and which is, of course, as old as childhood is. The present given by the Emperor Napoleon to his infant son, the King of Rome, has been obtained as an exhibit.

Perambulators and cradles and such adjuncts of childhood that flourished in the seventeenth century, have been collected to augment the display. Children's furniture from the sixteenth to the nineteenth centuries will be shown, as will as a display of British and foreign children's clothes, hats, shoes and gloves of the same period, early games, cards and jigsaw puzzles, playbooks and lesson books. A series of rooms is being arranged to depict child scenes of bygone days with inevitable wax figures in the Madame Tussaud tradition. There will be portrayed in similar fashion a Kate Greenaway scene, a Victorian Sunday, the ancient nanny and the modern nurse.

The British royal family, as usual where charity is the object, is according widespread support to the exhibition. Queen Mary is contributing playthings of her own childhood, and toys which enthralled the young Prince of Wales, his brothers and sisters. Two gold rattles given by Queen Victoria to the Prince of Wales, and the uniform guard she desired to open the gates to the Duke of York, as artists. It is said these efforts are just as arduous in result and effect as any of less exalted youth.

Perhaps one of the most interesting of the relics to be exhibited, however, has no connection whatever with the childhood of the great or the near-great. It is a peevish feeding bottle, believed to date back to about 1660. It was discovered by a farmer near a village in Wales to feed his infant. Probably no more fitting place could be found for this memento of a bygone period and a long-forgotten childhood than alongside the relics of royal youth and palace playthings. It is a striking reminder of that strange democracy of the very young, that constant symbol of the "great levellers"—childhood and death—and it is to be hoped that as, in these transitional days, it will be interpreted by those privileged to patronize the exhibition.

There is a timely moral lesson, too, in the story recently told by one of the better known financial journals. It happened that a shabbily dressed, elderly woman entered the classic portals of a large up-town bank in New York, and told the uniform guard she desired to open an account. She was shown to the new account department where three officers of the bank were more intent upon the approaching lunch hour than upon new business, particularly business which came in through the manager. As it happened, lunch was over, and the woman was left to the pensive garb.

After stating her mission, the old lady asked to see a statement of the bank's financial position, much to the surprise of the manager who was accustomed to having the institution's financial status taken for granted, particularly by small depositors. However, he presented the requested statement, answered her startlingly intelligent and pertinent questions, which satisfactorily received, brought the information the lady wished to open an account. She gave her name and other necessary information, and casually, for he expected a small initial sum, he asked, "How much do you wish to deposit?"

"Thirty-one thousand dollars," replied the old lady, equally casually, as she proceeded to count out the money in bills of various denominations.

Harry Lander's New Mansion
 Lander Hall, Sir Harry Lander's new mansion at Strathmore, Scotland, is receiving its finishing touches, and will be ready for occupancy in a few weeks. He had given the planning his close attention, and the building contained many historic as well as unique features.

While excavating for a new building in Kottenfeld, Berlin, of large groups of people, recently found an aqueduct in which the top-pipe sections could be removed for cleaning.

Among men the safest auto driving ages are between 20 and 30, and among women, between 20 and 40, legal estimate. It is at these ages, according to statistics recently compiled in England.

Wearry Days—Sleepless Nights

Wrack the Nervous System

Men and women lose night after night on sleepless beds. Their eyes do not close in the refreshing repose that comes to those whose nerves are strong. They are irritable and nervous, weak and worn out, and everything looks dark and gloomy.

Milburn's H. & N. Pills is the remedy that is required to restore them the blessing of good health. They bring back the sound refreshing sleep, tone up the nervous system, and give the spirit that is the result of renewed mental and physical vigor.

Marvels of the Human Eye

By F. M. CROWE, Optometrist-Optician, Calgary

NO. 6.—ASTIGMATISM

We now come to a very common defect of the eye, one little understood by the public many of whom consider it a visible inflammatory condition or disease or that it is a temporary ailment, which is not so.

The simplest explanation of Astigmatism would be to describe it as an eyeball in which one or both refractive surfaces (Lens and Cornea) are not symmetrically curved. Try and visualize a perfectly round ball of glass from which you cut a slice. Now the Cornes of the eye should be an equally curved in all meridians at that slice of glass and when it is not, the condition is known as Astigmatism. It is usually congenital but may be acquired by a blow or result from a scar after an eye has healed. It is also considered probable that many cases of Astigmatism have resulted from undue pressure on the eyeball in infancy by the parent wailing the child's eye, also children rubbing their eyes in the horizontal direction in their "crying" years as it is usually directed in that direction that Astigmatism exists. An unsymmetrical (irregularly curved) Lens is usually due to the muscles forcing it to assume a shape which will not neutralize the positive, offset or neutralize the malformed Cornea, in the interests of good vision.

We have seen that rays of light from a distant object, when they enter the eye, must focus on the retina and comfortably, must focus on the retina and do so must pass through symmetrically curved surfaces which eye is impossible. Astigmatism exists because the focus is a blurred line instead of a point. The result of this is that the third motor nerve sends power to the ciliary muscle (which controls the action of the Lens) and the Lens is forced into an unnatural shape in the effort to obtain a clear brain image. But imagine, if you can, the eye under the amount of nerve tension used up by such eyes for six years daily year after year. Is it any wonder that the eye eventually break down under the strain.

Some symptoms of Astigmatism are headaches, nervousness, irritability, loss of "pep", tilting of the head to see better, lassitude, indigestion, chronic constipation and even "neuritis" or "Dance". Different individuals are differently affected. The symptoms occurring in an individual

depend upon the age, temperament, physique and occupation.

Strange as it may seem the discomfort experienced as a result of Astigmatism is not at all in proportion to the amount of error. In fact it usually bears the reverse ratio, we find the better the vision the greater the eyestrain where a small amount of error exists. It is estimated that normal eyes use about thirty-five per cent. of the nerve energy that is required. How much is used by eyes that are abnormal? Could a body remain healthy under such circumstances? You answer.

We have no more reason to expect the eyes to be perfect than the feet or any other organ. Neither are they so and few eyes are without some degree of Astigmatism. A small amount can be tolerated by many without discomfort especially in outdoor occupations, but the present age of excessive close work, study, reading for pleasure, strong electric light, moving pictures and "glare" from almost everything we look at, all tend to magnify the defects in the human eye. It is doubtful if all our forefathers' eyes were any better or worse than those of this generation, but they lived differently in different occupations and had plenty of soothing green grass and trees to meet their gaze instead of the reflections from city pavements and roads, auto radiators, store windows. When the sun is shining we used coal oil or gas, not electricity, which is charged with rays harmful to the eyes.

Am I advocating a return to the old conditions of thought and life? No, I am merely pointing out that "eye-conditions" and many similar remote from 20 years ago conditions, is part of the price we are paying for advancing civilization. It has taken quite a time for me to tell you the worst. Now comes the better news. Science has again come to our aid in the form of instruments which, in the hands of a skillful optometrist, measures the amount and kind of Astigmatism and other defects—also machinery for grinding special lenses which when worn correctly neutralize the effects of the abnormal conditions with resulting normal vision. Normal amount of nerve energy used for the eyes leaving the other organs with their proper share of attention. The unpleasant and bodily symptoms disappear, work, pleasure and life is enjoyed instead of tolerated.

Progress For Persia

Mechanization Of Old Handicraft Industries Looks Like Miracle

And now the shaft of Persia has evolved a five-year plan. Progress is to make its debut through the mechanization of the ancient handicraft industries. It has created so many delights for collectors. Great carpet and rug factories will rear their looms where potter hands have labored after the traditions and the patterns of the centuries.

One will be the features that will come to those with incomes permitting. It no longer will variations in color, the lack of uniformity of some native dye mixture, or irregularities in pattern betray the advent of a new native weaver. The innovations that began with modern eyes and chemical washes will reach their climax in a uniformity that matches the best American "orientals".

Indeed, progress in Persia may make no progress at all. Who will want a genuine oriental rug if it differs not a whit from the mechanized product of the occident?

YOUNG MOTHERS

Don't experiment with children's colds... Treat them as you own mother did—externally. No dosing. Just rub throat and chest with...

The annual Satin-Glo point sale of the Butlers Hardware is being advertised for one week only, commencing on Saturday April 14, and ending on Saturday, April 21st.

Mr. and Mrs. A. Thomas and children motored to Milk River on Thursday to visit with Mrs. Thomas's parents. They returned home on Sunday.

Miss Edith Hechler came out from Calgary on Thursday and spent the week end at the home of her parents, Mr. and Mrs. W.A. Brubaker. She returned to Calgary on Monday.

Mr. and Mrs. S. F. Torrance and family were Calgary visitors for a few days last week and returned on Sunday.

Miss Joyce Lajing came out from Calgary on Thursday to spend the Easter vacation at her home.

Young Donald Mortenson of Stony Plain is visiting with his aunt, Mrs. Jas. Smith.

A GENTLE WAY TO RELIEVE CONSTIPATION

Why take harsh laxatives that irritate and injure your system, just as well have Bexall's Osmolite, the original chocolate-flavored laxative, which is as gentle as chocolate, yet so thoroughly Osmo nature could be kinder. They always afford for women, children and elderly people. Get a box of Bexall's Osmolite today at McKibbin's Drug Store, Carbon.

SUBSCRIPTIONS TO THE CARBON CHRONICLE ARE DUE AND PAYABLE NOW. PLEASE LOOK AT THE LABEL ON YOUR PAPER AND IF YOU ARE IN ARREARS WE WOULD APPRECIATE AN EARLY SETTLEMENT.

Mr. Henry Penner of Tempest came up on Saturday and spent Easter Sunday with friends in Carbon. He returned on Monday morning.

Harold Edwards is spending Easter week at his home in Carbon.

Mr. and Mrs. Harley Wilton were Calgary visitors the first part of the week.

Mr. C. H. Nash and Daphne left on Saturday for a couple of weeks holiday at the Pacific coast.

The spring stock show is on in Calgary this week and John Atkinson and Stewart Hay have both entered stock.

Miss Lella Gordon was a Calgary visitor this week and returned on Monday.

Messrs. C. W. Gray, Harley Wilton, George Wise, Archie McLeod and Joe O'Rourke were on jury duty at Drumheller this week. There was only one jury case on the docket and Harley Wilton and A. McLeod were called the others having excused from further duty by the Judge.

REV. J. R. DAVIES

With as much enthusiasm as the Douglas Social Credit plan, many in the district will be pleased to hear that Major Douglas himself will appear on his plan in Calgary on Saturday, April 7. Arrangements are now being made for the meeting, which will be held under the joint auspices of the Men's Canadian Club and the Group of the Open Mind.

Here and There

The first event in the celebration of the Centennial of the City of Toronto, to be held this year, took place at the Royal York Hotel in the closing week of 1923 when Mayor Stewart handed out leaves of "Centennial" bread to a large crowd of interested recipients.

Emile St. Godard and Leonard Seppala, heroes of many hotly fought Dog Derby, will fight it out again in the Quebec Dog Derby of February 23-25 next to be held in the city of Quebec. Many other teams have already received and special training events for the big show are being held.

A tip for the encouragement of the younger ski generation is given by the Canadian Pacific Railway in the company's inauguration of a special school age ski excursion at low rates to the Laurentians just outside Montreal. The special was heavily patronized by the youngsters.

Statistics recently issued by the Bureau of Railway News and Statistics show that the fastest way to travel is by railroad. In a year's operation of the Canadian and United States railroads only one passenger was killed out of a total of 489,052,259 persons carried a total of 16,341,246,109 miles.

The old belief that women cannot wear high heels without injury to posture and health was thoroughly disproved by S. S. Brower, shoe expert of Milwaukee, delegate to the National Shoe Retailers Association convention recently held at the Royal York Hotel, Toronto.

A Canadian inter-collegiate ski meet, unique development in Eastern Canada as far as skiing is concerned, will be held at the Selwyn Club, Montebello, end of January. Toronto University, Ottawa University, McGill and St. Patrick's College in Ottawa are among the collegiate teams to be represented.

Snow shovels and twenty below in many places in Canada are replaced by mud and 55 above at Victoria B.C., these days when the sixth annual midwinter golf tournament swings into action at the Royal Colwood Course February 19-21. Enquiries and early entries from ardent golfers indicate that again this year the tournament will be a big success.

Silver Fox Breeders' Association convention was the first of three big gatherings held at the Chateau Frontenac, Quebec City this year. It was simultaneous with that of the Canadian Fruit and Vegetable Jobbers Association and was followed shortly after by the convention of the Canadian Association of Tourists and Publicity Bureaus.

Gratification at the way in which the public is going the new rail schedule service between Moose Jaw and Regina was expressed by H. R. McIlwenn, general passenger agent, Canadian Pacific Railway, Winnipeg, when interviewed recently at Regina. He had had ample opportunity to view the running of the new "seven-day" train service between the two cities and was very pleased with the results being obtained.
